**Progressive Components Announces C-Core Expansion**

Progressive Components is advancing its Collapsible Core offering. The RT-Series now includes five new standard sizes, three of the new sizes are smaller (from 17.3) and two sizes larger (up to 107.3) than the original standard sizes.

The RT Series offers toolmakers and processors these advantages:

- Simplification of mould designs and elimination of gear/rack systems
- Save time by purchasing with undercuts/threads already machined
- Reduction of mould tool size and height.
- Reduction of moulding machine press size.
- Shorter delivery times backed by 35 years of experience with the technology

Progressive is headquartered in Chicago, Illinois, USA. Through its offices in Europe and Singapore, Progressive offers distribution from seven wholly owned locations on three continents.
