

PRESS RELEASE

Toray presents high quality ABS resin under brand name TOYOLAC

Toray Plastics (Malaysia) Sdn. Bhd., established on 3rd July 1990, with capacity of 330,000 tonnes per year well-known as the South East Asia's largest producer of ABS resin has since built a reputation as a leading ABS resins manufacturer manufactures high quality ABS resin under the brand name of **TOYOLAC**. Combined with the capacity of Toray's ABS plant in Japan, Toray group has a total ABS production capacity of 402,000 tonnes per year and became one of the global largest ABS manufacturers.

TOYOLAC is a thermoplastic material known as ABS resin which is composed of a acrylonitrile, butadiene and styrene. **TOYOLAC** is lightweight, strong, attractive, easily processable and ensures excellent mechanical, chemical, electrical and coloring properties. **TOYOLAC** has proven far superior to other plastics and is attracting much attention in a wide variety of fields. In addition, due to the excellent whiteness of the pellets, **TOYOLAC** is becoming known as a material able to satisfy diversified applications.

Toray Plastics (Malaysia) Sdn. Bhd. produces general purpose ABS and specialty ABS grades such as transparent ABS, flame retardant ABS, high heat ABS, chemical resistant ABS, glass fibre reinforced ABSG and ASG resins.

Toray is the earliest company to start manufacturing and sales of Transparent ABS in Japan domestic market since 1966. Thus, we have accumulated more than 40 years experience in Transparent ABS technology and know-how. Today, Toray is the largest Transparent ABS producer in the world with capacity of about 80,000MT per year.

TOYOLAC Transparent ABS shows high clarity with less haze and excellent mold ability and mechanical characteristics. A great improvement in design is supported by the excellent transparency, mold ability and secondary process ability. Improved functionality and properties balance has expanded the design freedom. The applications cover from home electrical appliances, office automation apparatus, general machinery, amusement products and stationary application.
